AC Servo Systems *SANMOTION G* Recognized in the GOOD DESIGN AWARD 2023

We are proud to announce that our AC Servo Systems *SANMOTION G* has received the GOOD DESIGN AWARD 2023 sponsored by the Japan Institute of Design Promotion. The awarded product, AC Servo Systems *SANMOTION G*, combines “powerful performance” to improve manufacturing efficiency and “eco- and user-friendliness.” We are honored that our corporate philosophy, “We at SANYO DENKI Group Companies, aim to help all people achieve happiness, and work with people to make their dreams come true” has been recognized through our product development. We will continue to address social issues through the development of new technologies and products.

1. Product Overview

(1) Product name

AC Servo Systems *SANMOTION G*

(2) Features

AC servo systems can control position, speed, and torque, enabling high-precision positioning. In addition to industrial equipment, the applications of AC servo systems are expanding to everyday life such as medical equipment and transportation systems.

The award-winning *SANMOTION G* is an AC servo system that achieves advanced servo performance, compactness, light weight, and energy savings, with its servo motors that power various equipment including semiconductor manufacturing equipment and robots, along with servo amplifiers to control them. This product supports a wide range of fields in society and has also achieved the energy savings and size reduction required worldwide.

Evaluation points for the award included a user-friendly design, a compact, eco-friendly motor with enhanced performance, and an amplifier with an easy-to-understand interface.
